

Join Our Team!

Groundwork Studio is a young and growing landscape architectural and planning firm whose goal is to take landscape architecture, urban planning, and urban design to its full potential in terms of site design coordination, improving overall project synthesis, ecological resilience, functionality, and site specific experience. We believe that when we improve our surroundings, we transform our selves. We recognize that effective and relevant planning is a critical component to achieving this goal, and we're looking for a creative, motivated certified planner to help us envision and build that capability.

The preferred candidate has a Master's degree in Planning, a minimum of 2 years' experience in a design/planning office setting, can think through problems with minimal supervisory input, is comfortable with public speaking and communicating with clients independently, has experience writing and producing reports, and is highly organized.

Fluency in industry standard programs (MS Office Suite, Adobe Creative Suite, etc.) and GIS/ESRI applications is a minimum requirement. Fluency in AutoCAD and/or Sketchup is a plus. Please tell us what other programs you know.

Basic duties include, but are not limited to, parks, recreation and open space planning, long-range planning and policy development, urban design, public engagement, metropolitan redevelopment area planning, etc.

If this sounds exciting to you, we invite you to submit a cover letter, resume, and portfolio for consideration to amy@groundworkstudionm.com
