

Technical Standards: Integrating Land Use, Transportation, and Water

The County recently updated its development standards to include complete streets and green storm water infrastructure, both of which support community resiliency. The County's Technical Standards guide development of complete streets, grading and drainage, GSI/LID, access and parking, utilities, lighting, etc. in the unincorporated area of Bernalillo County. The standards were designed to integrate with County plans and policies.

APA core competencies include:

- 5. Plan Implementation and Placemaking
 - b. Environmental Management
 - d. Urban Design
